LEARNING OUTCOME

1

Mastering theoretical concepts in the fields of marine hydrobiology, oceanography, underwater acoustics, marine instrumentation and robotics, remote sensing, and information systems, as well as artificial intelligence for problem solving related to marine resources and environment.

2

Apply the latest marine science and technology in order to explore marine resources and environment and contribute to growing the blue economy.

3

Initiate innovations for exploration, development of marine utilization and advancement, and sustainable development.

PROFILE

A Brief History

The Department of Marine Science and Technology is a working unit under the Faculty of Fisheries and Marine Science, IPB University (FPIK-IPB). The Department offers a Bachelor's degree with Honor (BSc. Hons) in Marine Science and Technology. The department consists of four academic divisions, including Marine Hydrobiology/B10, Oceanography/OS1, Ocean Acoustics, Instrumentation and Robotics/A1R, and Marine Remote Sensing and Geographic Information System/1SK.

The history of the Department of Marine Science and Technology (ITK) began with the initial establishment of the Study Program (PS) of Marine Sciences in the academic year 1986/1987. This was in response to the Circular of the Director General of Higher Education No. 1023/D/Q/1985 concerning the pioneering formation of a new marine science study program (new S1 (bachelor's degree) of marine science). Then the IPB Marine Science Study Program was officially confirmed by the Director General of Higher Education Decree No. 22/DIKTI/Kep/1988 with the principal objective of developing education and research in the field of marine biological resources exploration. Through the Directorate General of Marine Education Education Project (ADB loan No. 894-INO/895-INO (SF), the main facilities and infrastructure for academic and research activities were built, namely the Marine Center Building at Darmaga Bogor IPB Campus and the Marine Field Station at Pelabuhan Ratu Sukabumi, West Java.

Based on the Rector's Decree No. 073/K13.121/OT/2000 dated May 27, 2000 the status of the Study Program of Marine Sciences of IPB was upgraded to the Major of Marine Science and Technology with the mandate to develop marine science and technology to understand the characters, phenomena and processes of physics, chemistry, biology and marine geology by utilizing marine acoustic and remote sensing methods and technology to explore biological resources and the marine environment.

The Department of ITK IPB is the first Marine Science and Technology Department in Indonesia and has always been a trendsetter in that field.

CURRICULUM

Program Structure

Option 1

3 + 1 (3 year at IPB University and 1 year at partner University)

Option 2

3.5 + 0.5 (3 year at IPB University and half a year at partner University)

Option 3

4 + 0 (4 year at IPB University)

CONTACT

The Faculty Campus

The campus of the Department of Marine Science and Technology an Campus is located in Bogor City. The closest train station is Bogor Station. With easy access to neighboring cities, the campus is just 60 minutes from Jakarta on Commuter Line, making it convenient for students to commute from out of town. The rich natural surroundings provide students with an ideal environment to study.
