PROFILE

A Brief History

Fast-moving development in a synergistic and sustainable manner demands many reliable professionals, especially in the field of management. Management is a discipline that develops human resources with the competence of mastering knowledge and skills in the context of individuals and organizations. Therefore, management science is needed in various fields, both profit and non-profit, including agriculture, plantations, animal husbandry, fisheries, forestry, and other industries and services.

The establishment of the Department of Management within the Faculty of Economics and Management of IPB is intended to support the achievement of IPB's goal of becoming an international standard university that understands the consequences of economic globalization and is more responsive to environmental needs in responding to the challenges of science and technology development and the implementation of education that is more oriented to the needs of society. The Department of Management balances the resource- and production-oriented approach that has long characterized IPB with the demand- or market-oriented approach that characterizes the way management works. In the view of management, IPB is of high quality when it is able to produce science and technology and graduates who meet the demands of community needs, and are able to keep up with the times.

Currently, the Department of Management has four sections/divisions that are authorized in scientific development, namely the Marketing Management Division, Financial Management, Production and Operations Management and Human Resources and Organization Management.

The student capacity for S1 is 180 people with a competitive input ratio, and the student capacity for S2 is 60 regular classes and special classes. Management is one of the Departments that fall into the top 5 most interested categories at IPB. To maintain the quality of management, the Department is accredited by BAN PT (National Accreditation Board of Higher Education) and ISO 9001: 2015. Every 4 years a curriculum workshop is held to adjust to the changing times.
